

Ninja Turtle Scalper EA Inputs:

The Ninja Turtle Scalper uses the Donchian Channel to generate entry signals, just like the famous Turtle Traders. It is designed for scalping with a tight trailing stop. Please note: live results can differ from backtests, because the tight trailing stop is sensitive to slippage during news and fast moves.

Volume Modes:

VOLUME_LOTS > Uses a fixed lot size (the "Volume" value).

VOLUME_MONEY > Lot size is calculated so the "Volume" amount of money is risked.

Signal Trigger Modes:

TRIGGER_TICK > Checks for signals on every tick.

TRIGGER_M1 > Checks once per new M1 bar.

TRIGGER_DC_BARS > Checks once per new bar of the Donchian Channel timeframe.

<Trade Settings>

Volume Mode: How the lot size is determined (see Volume Modes above).

Volume: Fixed lot size (VOLUME_LOTS) or risked money amount (VOLUME_MONEY).

TP Percent (0 = No TP): Take-profit distance as a percentage of the open price. 0 disables the TP.

SL Percent: Stop-loss distance as a percentage of the open price.

TSL Trigger Percent (0 = No TSL): Profit (% of price) at which the trailing stop activates. 0 disables it.

TSL Percent: Distance the trailing stop is kept behind the current market price (% of price).

TSL Step Percent: The stop loss is only modified if it moves at least this distance (% of price).

<Signal Settings>

Signal Trigger: When the EA checks for new Donchian Channel signals (see Signal Trigger Modes above).

Donchian Channel Timeframe: Timeframe of the Donchian Channel.

Donchian Channel Period: Number of bars for the Donchian Channel.

<More Settings>

Magic Number: Unique number identifying this EA's trades. Use a different one for every EA on the same account.

Order Comment: Comment attached to every order the EA places.

Send Logs: Activates or deactivates additional log output.

Note: The default inputs are not a recommendation and are not necessarily the best settings. Different symbols require different inputs. Always test in the Strategy Tester and on a demo account first. All the best and good trades :)
